

Septic Tank Treatment

Easily Maintain your Septic System
When functioning properly, house hold wastes are collected in your septic tank and then broken down, liquefied, and deodorized. Because this process is biological, it is easily upset and may stop working.

Some common factors that tend to upset the natural process are:

- **Overuse of disinfectants**
- **Overuse of bleaches**
- **Overuse of detergents**
- **Very hot or cold conditions.**

Such factors kill the micro-organisms that work to keep your septic system running properly. Septic Klean 3 replenishes and boosts the supply of these valuable micro-organisms and allows natural activity to continue.

Simple and Easy to Use

Using Septic Klean 3 is simple... just drop in the convenient pre-packaged, pre-measured pouches into your lavatory bowl. The plastic pouches dissolve away so you don't have to handle the powder. No fuss - no bother - no effort!

Benefits of SK3:

- Reduces Frequent Pumping of Septic Tank
- Extends Life of Drain Area
- Controls Methane Production
- Improves Drain Field Percolation
- Keeps Sewer Lines Open
- Neutralizes Detergent Bleach
- Prevents Drain Blockage
- Will Not Attack Plastic or Metal Plumbing
- Safer to Use than Harsh Chemicals
- Degrades Waste Faster
- Degrades Paper, Grease and Vegetable Waste
